

# Do You Remember?

## That...

**No Concept Note** is required for a Project that is a continuation of a previous or existing project. **But** you must have a **Project Document**.

**Concept Notes** are to be reviewed **virtually**; **No PAG** technical meeting for Concept Notes.

**Innovative** projects or programmes and **Large** project/programme USD\$3,000,000 (three million) should have **face to face Peer Review**.

## And by the way ...

Concept Note Peer Review is beneficial to the Project Manager and to the resulting project and UN-Habitat. Peer review increases the quality of the concept note, probability for successful fund raising or implementation of the resulting project.

It also confirms the consistency of the Concept Note with the UN-Habitat's mandate, Strategic Plan, work-programme and priorities.
