Do You Remember?

That...

Core PMO is expected to carry out **Project Financial and Managerial Feasibility Assessment within two (2) working days** of receipt of a Project Document. The assessment report should be made available to PAG members.

The PAG Secretary is expected to **upload** in PAAS the **Minute** of the PAG Technical review meeting, with the signed attendance register/sheet, at the **latest within three (3) working days** after the related PAG meeting is held. The deadline for upload of minute is the same day in the case of Emergency Project. During the PAAS offline period, the minute should be sent via email within same deadline of three (3) working days.

And by the way ...

The Project Financial and Managerial Feasibility Assessment report is a **requirement** for PAG Technical Review meeting. Hence, it should be made **available** to the PAG members (uploaded or sent by email) **before** the PAG Technical review meeting is held.

The Approving Officer **requires the Minute** of the PAG Technical review meeting to make his/her decision on a Go/No Go.
He/She is expected to review the related PAG minute and **use** the **recommendation** of the PAG members to inform his/her decision. **Where** the Approving Officer takes a **decision** that **is contrary** to the recommendation of the PAG members as contained in the minute; a **written justification** should be provided by him/her and **put in file.**
