

Do You Remember?

That...

No Project or Programme is **exempted** from PAG technical review.

All Projects and Programmes are required to go through a PAG technical review. This includes:

- Child projects of a programme that was reviewed by PAG.
- Project that is a continuation of an existing project but with expanded scope and/or changes to any part of the project original approved logframe, e.g. Changes to Outcomes/EAs, and Outputs.
- Low value projects.

And by the way ...

For any unusual reason, that necessitates a project or programme to **not comply** with this requirement; a **written justification approved** by the Director, Programme Division is required for **audit purposes** and must be put in file.

The Programme Division **Director** is **accountable** for decisions made.

The **option of virtual PAG** technical review should be considered at all time **before** outright **exemption** is granted
